KV-S2087
SCANNING SOLUTION

KV-S2087 HIGH SPEED SCANNER

COMPACT *and* DURABLE

The KV-S2087 scans at a speedy 85 ppm/ 170 ipm.* This allows it to quickly convert order forms, invoices, sales reports, and other large-volume documents in various sizes and thicknesses into data.

Featuring the same speed and durability as an A3-size scanner, the KV-S2087 relieves the office staff from much of the bothersome work of scanning.

*A4/Letter, Portrait, 200/300 dpi, Binary/Color.

Handles Large Document Runs

Up to 200 A4/Letter pages can be set in a single run. This eliminates the need to set up scanning parameters time after time and brings greater efficiency to scanning jobs.

Compact Design in Spite of the Large-Capacity ADF

The compact design lets you place the KV-S2087 right on your desk or on a nearby shelf. It's even more compact when the paper feed tray is closed.

Various Types of Documents Can Be Scanned

By using two types of transport systems — U-turn and straight — the KV-S2087 is able to scan thin sheets, thick sheets, booklets, cards, and other documents of varying sizes and thicknesses. The transport system can be switched by simply operating a lever on the side, for quick and easy scanning of a wide range of documents.

Cards   **Booklets**   **Documents**

U-turn paper path
Ideal for scanning a large volume of documents.

Straight paper path
Ideal for scanning booklets, cards, and long documents.

A3-size Data Can Be Created
By combining Booklet scanning and the Double Exposure function, you can create A3-size document data.

A3-size 2-fold document.   Scan both sides.   Compose the scan data to create A3-size data.

On-Board Hardware Image Processing
The Panasonic KV-S2087 scanner features a built-in CPU that processes images by adjusting sharpness and contrast to detect and improve errors — creating the finest digital images possible. Conventional scanners rely on PC-based software to perform all image processing tasks — slowing performance and impeding workflow. By dedicating an on-board processor to a single purpose, the KV-S2087 scanner works faster — ushering in a new era in high-speed scanning.

Post Imprinter + Digital Imprinter
The post-imprinter prints text on the back side of the original after the document is scanned. The digital imprinter adds text data to the scanned image. It does not use any ink, and helps facilitate document management.
